

Boban Stojanovski

Full Stack Web Developer

Address: Skopje, Macedonia • **Cell:** (+389) 70 398-547 • **Web:** <https://www.shlaki.com/>
E-mail: boban.stojanovski@brainaux.com • [LinkedIn](#) • **Skype:** boban984

PROFILE

10+ years professional experience in web development covering the full stack of technologies, back-end and front-end (although more focused on the front-end these past few years).

On the back-end using the .net and .net core platform, MSSQL, ASP.NET WebForms, MVC and ASP.NET Core, on the front-end a mix of technologies over the years, the ones with most impact being jQuery and Angular.

An Important part of my work habits is keeping an eye for new technologies, finding ways to optimize and keep a clean code-base, all the while focused on sharing the knowledge with the team.

SKILLS

Front-End (Client)

JavaScript ES5/ES6, TypeScript, HTML5, CSS3, Sass, Less, jQuery, Knockout, WinJS, AngularJS, Angular 2, Handlebars, JsViews, RequireJS, webpack, gulp, npm, bower

Back-End (Server):

Microsoft .NET Framework, .NET Core, ASP.NET MVC, Web Forms, Telerik and DevExpress Controls, WPF, Web API, SignalR, NHibernate, Entity Framework, C#, NodeJS, Socket.IO, WebRTC

Mobile:

iOS SDK, Swift, Android SDK, Hybrid Apps: Ionic, Sencha Touch

Tools:

Visual Studio, Visual Studio Code, MSSQL Management studio, Eclipse, XCode, Git, TFS, SVN

EXPERIENCE

2006

I volunteered for 3 months in a company named DreamFactory, making web pages using Adobe Flash.

2007/08 (junior developer)

Worked as a call operator in Onnet info center for 6 months and 6 months as a developer making linux bash scripts and asp.net intranet web application using.

2009 (back-end developer)

Worked as freelancer for a TV channel company , making a web application for gathering and displaying tv ratings , using ASP .NET 3.5 with C#, report Builder 2.0 and SQL Server 2008, Report Server.

2010 March – 2011 October (web developer and team lead)

Working as web developer and team lead at Vertigo-NME

Developing web and facebook applications with the following technologies:

- Backend: ASP.NET 3.5/4.0, WebForms, MVC 2/3 (razor), Telerik controls, Linq2Sql, NHibernate , ADO.NET
- Frontend: JavaScript , jQuery , AJAX

Meeting with the clients in person or using skype, to assess their needs and decide on the best strategy to build their product and later on continuous communication to make sure the project stays on the right track.

Part of the projects I've worked on (all the web sites have custom CMS):

- [Mepso](#)
- [Promedika Medikal Centar](#)
- [Promedika](#)
- [Nalas.eu](#)
- [Skopje Film studio](#)
- [Kaunt.mk](#)
- [TravelSolution](#)
- [Sme-finance](#)
- [Portalb](#)

2011 October – 2012 March (senior web developer and team lead)

Working as a .net developer at Matrix-Global.

Development and maintenance of the EPRS (Electronic Prepaid Recharge Service) system, connecting the mobile connectors (ex: Orange) with the EPRS system so a valid transaction can be made of recharging the credit on the mobile phone or paying for products and bills.

The project consists of a website, backend windows form application, Java mobile application, and a control project that all of the modules use to communicate. The project was built with .net 2.0 framework using VB language, web services, ADO.NET and WebForms.

2012 April – 2016 April (senior web developer and team lead)

Front-End team lead at Solaborate, a social network for Tech professionals, the site is a Single Page App using a variety of technologies (<https://www.solaborate.com>).

Developed using ASP.NET, JavaScript, jQuery, jsViews, RequireJS, SignalR, webRTC ... and other frameworks and technologies.

- Structure the Client Code (follow best practices)
- Front-End Programming and optimization
- Writing custom jQuery plugins
- Design implementation
- Back-End C# programming (API)
- Writing basic SQL procedures
- Designing part of DB schema
- Coordinating and Supporting web developers

Worked on the mobile app using Sencha Touch 2 framework (now redone using Swift for performance reasons).

I would say I have basic knowledge of Sencha Touch. [Link to app](#)

Team lead on for the Solaborate Windows Store App using WinJS. [Link to app](#)

Also worked on the native Android app. [Link to app](#)

In 2015 worked on a project as part of an outsourcing team.

The project is to develop a web app for complete management of a telecommunications company, the client already had a desktop app which we need to port to the web.

I am team lead for the frontend part, meaning choose the JS framework, setting up the web project structure, implement best practices and help other developers to get up to speed with AngularJS.

2016 April – 2016 October (senior web developer and team lead)

Team lead at [Symphony Solutions](#) on multiple projects and teams. Daily activities include knowledge transfer to junior developers, coordinating the teams and working on my own project .net core with Angular 2.

Technologies/Tools: C# (.Net 4.0 – 4.5), MS SQL (optimization, indexes, triggers, stored procedures/functions), Entity Framework, MVC, WebAPI, and Windows Services.

Using Telerik & SyncFusion libraries, Angular 2, Webpack, TypeScript etc.

2016 October – Currently (senior web developer)

Senior front-end web developer at [Brainaux](#) mainly focused on the JS stack.

Project's Description:

- "Re:public" is data exchange web platform
Beneficiary of the project: Re:Aktiv Skopje

Responsibilities:

- Requirements Analysis
- Front-end programming and optimization approval
- Front-end system optimization

EDUCATION

I was a student at Faculty for Natural science and mathematics in Skopje at the Institute for informatics, specializing in Information Systems. Dropped out of college in the last year of studies.

High school: Mathematical Gymnasium "Nikola Karev"

OTHER

Foreign languages:

English: Excellent writing and reading skills, speaking fluently

Social skills:

- Self initiative, self-motivated, positive, innovative, team player.
- Team leader on multiple projects
- Communicating with clients
